

BLACKVEIN CIRCUITS LIMITED

Statement on Regulation (EU) No 2019/1021 of the European Parliament on Persistent Organic Pollutants POPs Regulation

Persistent organic pollutants (POPs) are substances that persist in the environment, accumulate in living organisms and pose a risk to our health and the environment, they can travel via air, water or migratory species. They have been a serious concern since the EU regulation (EC) No 850/2004 of the European Parliament and entered in 2004 following amendments the POPs regulation was brought into regulation (EU) 2019/1021 in 2019

Blackvein is aware of its part in protecting the environment and human health

To this end we expect all of our suppliers to comply with this directive and to advise us accordingly of any potential exceptions. Based upon the information we have verified, we announce, to the best of our knowledge, our products are in compliance with the POPs regulation
We will continue to follow updates to the POPs regulation
